

CodEvo

Advertising, queue and ingredients book management software

CodEVO software provides:

- **server program** for system control;
- **software modules** for managing information peripherals;
- **information management** at point of sale (counter/hall);
- **ticket dispenser management** for the issue of tickets.

CodEVO Light is the ideal solution for Retail. Designed and optimized for small screen sizes (15" to 26"). Extensive information is available for both the counters and the hall, as well as for ticket dispenser management.

CodEVO Professional is the solution designed for small-scale retailers and for large screens (from 32" up to Video Wall systems). Extensive information is available for both the counters and the hall.

It is also possible to combine the ticket service with the management of:

- Electronic ingredients book;
- Self-Order service for in-store reservation of groceries at the counter without the need to queue.

EIGENSCHAFTEN

- **Outstanding configuration flexibility**
- Ticket service with **electronic ingredient book** management
- **Self-Order service** for in-store reservation of groceries at the counter without standing in line
- Ideal for **any video size**
- **Line advancement controlled** directly from the scales with audio to call customers to be served
- **Reporting** for average wait times, service times, customers, and time slots
